1 Introduction

This is desktop application based on JavaFx to provide simple and easy functions. It's free and open sources.

1.1 What's New

2025-1-27 v6.8.3

- Add:
 - Read/write WebP image.
 - Data column type “Enumerated Short”: Data are displayed as String while saved as Short. Its benefit is saved storage while its disadvantage is lost independence and need other data to explain its values.
- Improve:
 - Data Manufacture:
 - Remove “Handle invalid value” from column definition. Operations handle invalid values as their judgement and logic.
 - Clear how apply or remove “format” when read, display, edit, save, export, or convert data.
 - Data Tree:
 - Change “Geography Code” as data tree.
 - Option to apply data format when export.
 - Locate node by title/id/time/value in tree.
- Solved problems:
 - Tree: Values are lost after save/move/rename/reorder node.
 - After migrated to 6.8.1 or 6.8.2, [“Data Manufacture” loads existed data incorrectly](#).
 - Data Manufacture: Updates are not saved if focus is not out in “CSV” mode.
 - “Set Values” of Data Manufacture may write wrong values.
 - Data should be converted as their types when row expression binds variables.
 - When change image size, interface works abnormally after user inputs wrong value of width/height.
 - Values of XYZ and Adobe CMYK are displayed wrongly in html of single color.
 - “FFmpeg information” and “FFmpeg media information” do not work.
 - In pop window, may fail to pop window.
 - In many interfaces, when save as file, the selected path does not work.
 - When open interface “Image Options” independently, some controls are not initialized.

[Closed requirements/bugs in this version](#)

Happy Chinese New Year!

1.2 Notice

Without enough testings, MyBox has low reliability and bad stability. When use MyBox, following may happen:

- Files/Data are damaged.
- Output wrong results.
- Functions fail.
- Other unexpected behaviours.

1.3 Cross Platforms

MyBox is implemented in pure Java and only based on open sources, and it can run on platforms which support Java 23.

Versions before v5.3 are based on Java 8.

1.4 Internationalized

1. All codes of MyBox are internationalized. Language can be switched in time.
2. Each language is defined in one resource files, like: "Messages_NAME.properties".
3. Support adding new languages online. Table is provided with English as comparison. New languages take effects at once.
Example, the new language is named as "aa", and its resource files are Messages_aa.properties.
4. Translated languages can be shared with others: Put the files under "mybox_languages" of data path and MyBox is aware of them immediately.
5. Embed Chinese and English, whose files are under path MyBox/src/main/resources/bundles/.

Language	Resource file of interface
Chinese	Messages_zh_CN.properties
English	Messages_en.properties

1.5 Personal

1. All functions are executed in local host.
2. All data are stored in local host.
3. No register/login/DataCenter/Cloud.
4. Access network only when user requests.
5. Only read/write data which user need.

1.6 Friendly

1. Provide tips of current function/interface.
2. Remember user's inputs or selections, and provide histories list.
3. Interfaces can be adjusted and some panes can be hidden.
4. Behaviours of some controls can be chosen.
5. Provide context menu and function menu to texts/image/html/table/tree.
6. Current texts/image/html/data can be popped.
7. Clipboards of texts/image/data can be managed.
8. Provide examples and useful information.
9. Appearance of interface and controls can be chosen and modified.

1.7 Data Compatible

1. Exported data are in common text formats, like txt/csv/xml/json/html.
2. Imported data are in common text format, like txt/csv.
3. At least one exported format can be imported.
4. Imported data are self-contain, that original data can be rebuilt without extra data.

1.8 Embedded Database System

1. Derby is free and open sources:
 - When start MyBox for the first time, some seconds are cost to create internal database tables and write initial data.
 - All database files are under data path, so different target data sets can be handled by switching data paths.
 - Multiple MyBox instances can share data by visiting same data path.
 - When database files not found under data path(damaged or deleted unexpectedly), MyBox can create database automatically.
2. Derby runs in embedded mode by default:
 - External processes can not access the database.
 - Only one MyBox instance can use the database at the same time.
3. Derby can run in network mode:
 - The first visitor becomes the server.
 - Processes of local host can visit the database in port 1527 and becomes its clients.
 - Processes out of local host can not visit the database directly.
4. MyBox internal tables save the data required by all functions. User can access and modify the internal data online.
5. User can define customized database tables.
6. User can view and edit definitions and data of database tables in paginated tables, and execute SQL statements.
7. To implement data sorting, transposing, statistic, and grouping, MyBox will create temporary database tables, and clear them in time.

1.9 Assit Coding Self

1. Monitor memory/CPU usage in real time.
2. Adjust logging online.
3. Generate icons automatically.
4. Edit and apply languages online.
5. Test automatically.
6. All kinds of documents.

4 Download and Execution

4.1 Source Codes

Source Codes	Size	Development Guide	Packing Steps
MyBox-src.zip	120M-	pdf	html

4.2 Self-contain packages

Self-contain packages include all files and need not java env nor installation.

Platform	Link	Size	Launcher
win10 x64	MyBox-win-x64.zip	360MB-	MyBox.exe
CentOS 7 x64	MyBox-CentOS7-x64.tar.gz	360MB-	MyBox
mac	MyBox-mac.dmg	360MB-	MyBox.app

User can double click the launcher to start MyBox or run it by command line. The default "Open Method" of image/text/PDF files can be associated to MyBox and a file can be opened directly by MyBox by double clicking the file's name.

4.3 Jar

When JRE or JDK([Oracle jdk](#) or [open jdk](#)) is installed, jar can run.

Notice: Due to compile failure, env on Linux is still Java 21 + JavaFX 21.

Platform	Link	Size	Requirements
win	MyBox-win-jar.zip	280MB-	Java 23 or higher
linux	MyBox-linux.jar.gz	280MB-	Java 21
mac	MyBox-mac.jar.gz	280MB-	Java 23 or higher

Run following command to launch this program with Jar package:

```
java -jar MyBox.jar
```

A file path can follow the command as argument to be opened directly by MyBox. Example, following command will open the image:

```
java -jar MyBox.jar /tmp/a1.jpg
```

4.4 Versions

Contents of this document may be expired, but its links refer to the latest versions.

The latest versions and all archived versions can be downloaded in following addresses:

address	downloads	readme
github	https://github.com/Mararsh/MyBox/releases	English Chinese
sourceforge	https://sourceforge.net/projects/mara-mybox/files/	English Chinese
cloud	https://pan.baidu.com/s/1fWMRzym_jh075OCX0D8y8A#list/path=%2F	

4.5 Configuration

Configuration file is under "User Home":

Platform	Path of MyBox Configuration File
win	C:\users\UserName\mybox\MyBox_vVersion.ini
linux	/home/UserName/mybox/MyBox_vVersion.ini
mac	/Users/UserName/mybox/MyBox_vVersion.ini

Add parameter "config="FilePath"" when run jar to change configuration file temporarily.
Function "Settings" can be used to change configuration values.

4.6 Backup and Recover

1. To backup, copy directories to other places.
2. To recover, override current directories with backup directories.
3. Need not backup each directory under data path.

Predefined directories under data path are listed below:

directory	role	internal referred	read/write automatically	need backup	comments
AppTemp	temporary files	yes	yes		cleared automatically
buttons	customized buttons	yes	yes		
data	internal data	yes	yes		
dataClipboard	data clipboard	yes	yes	yes	
doc	internal documents	yes	yes		
downloads	download files		yes		
fileBackups	files' backups	yes	yes	yes	
generated	generated files		yes	user decides	
ICC	ICC profiles	yes	yes		
icons	icon files	yes	yes		
image	image files	yes	yes		
imageClipboard	image clipboard	yes	yes	yes	
imageHistories	image edit histories	yes	yes	yes	
imageScopes	image scopes	yes	yes	yes	
js	javascript	yes	yes		
logs	database logs		yes		
map	map files	yes	yes		
mybox_derby	database	yes	yes	yes	
mybox_languages	customized languages	yes	yes	yes	
security	cert files	yes	yes		
sound	sound files	yes	yes		

4.7 Migration

1. Each version has itself's configuration file. New version can copy parameters from existed versions.
2. Data handled in each version are under "Data Directory" referred by it. Multiple versions can refer to same data directory.
3. MyBox is backward compatibility: Later version can work on data of previous versions. While forward compatibility is not supported: Wrong may happen when old version handles data of new version.

5 Implementation

MyBox is based on following open sources:

6 Common Functions in Interfaces

6.1 Main Interface

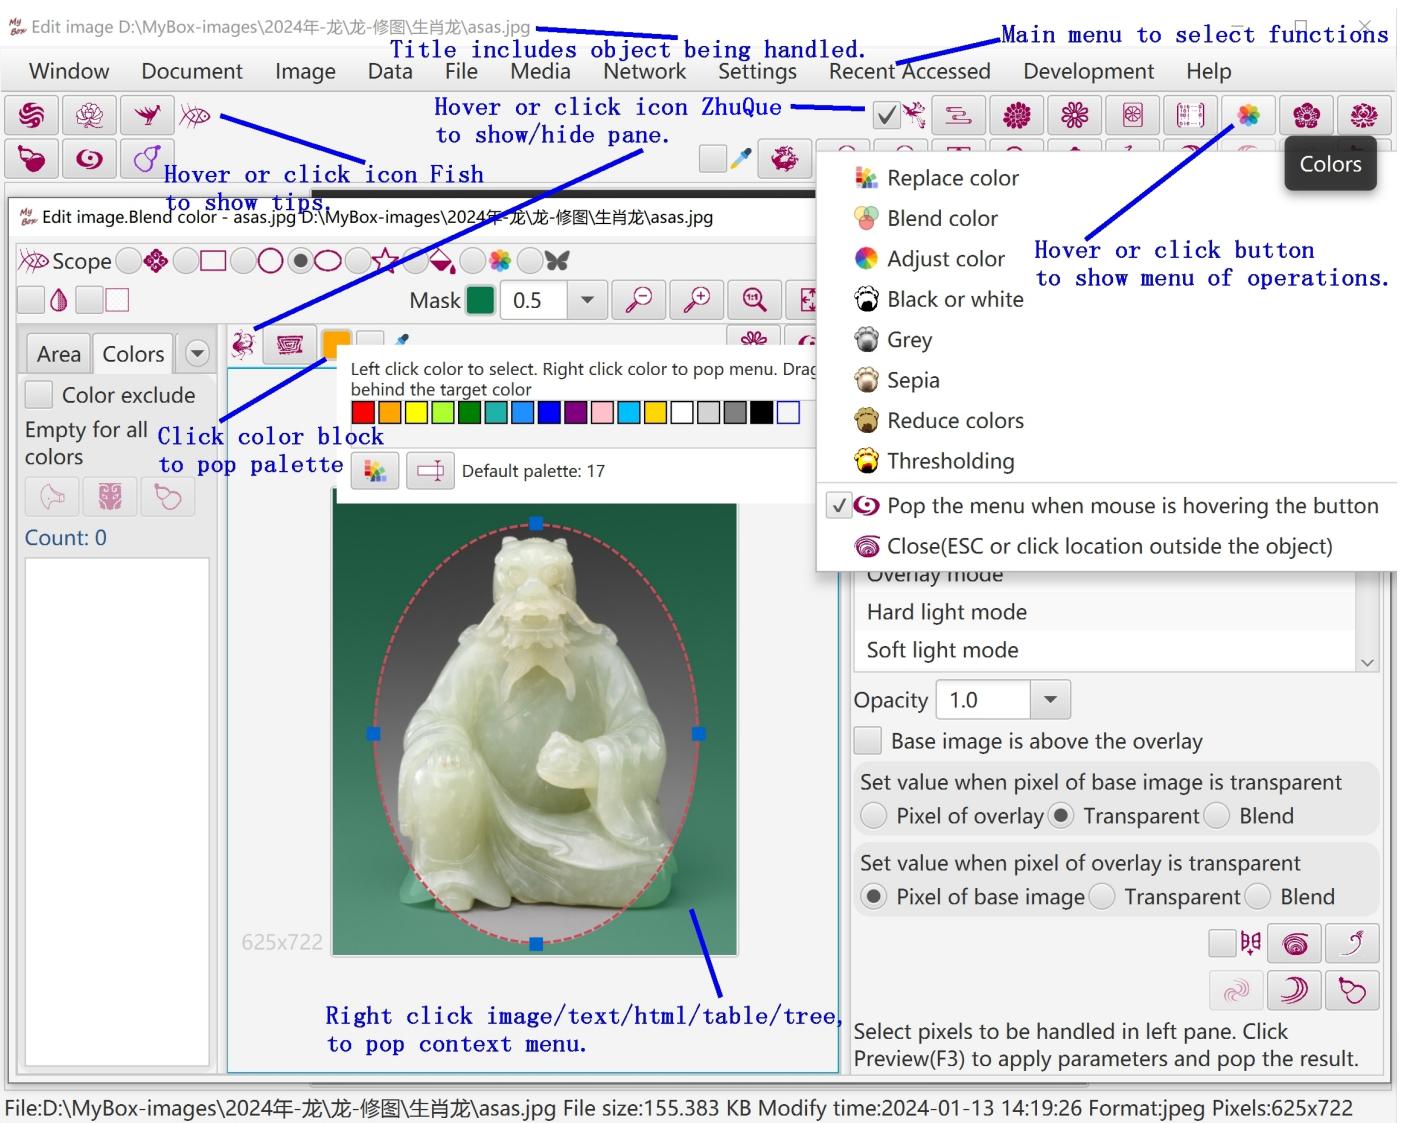

Main interface is shown after MyBox is launched. Move mouse over one icon to pop its menu. Then select a tool to start.

In any interface of MyBox, click key F8 to pop the main interface.

6.2 Interface Layout

1. Window title includes the object name being handled.
2. Main menu in top to open windows of functions.
3. Some interfaces include pagination toolbar which is generally in bottom.
4. Some interface include icon Fish. Hover mouse upon it to pop tips.
5. Some interfaces include left pane or right pane. If icon Rosefinch is there, hover mouse upon it to hide/show the pane.
6. To some buttons, checkbox, or icon, shortcut or tips will be popped when hover mouse upon them.

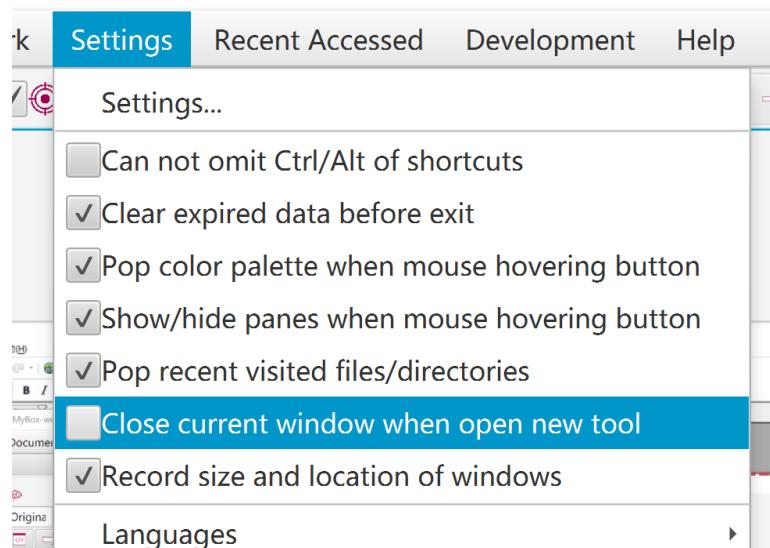

6.3 Set Font Size

1. Decrease font size by press key "CTRL" and key "-" at same time.
2. Increase font size by press key "CTRL" and key "=" at same time.
3. Select one font size of 12px, 15px, and 17px by click menu item directly.
4. Set font size in Setting window.

6.4 Open New Stage

To open new window for new scene and keep current scene in current window, **do not select** menu item "Settings"- "Close current window when open new tool".

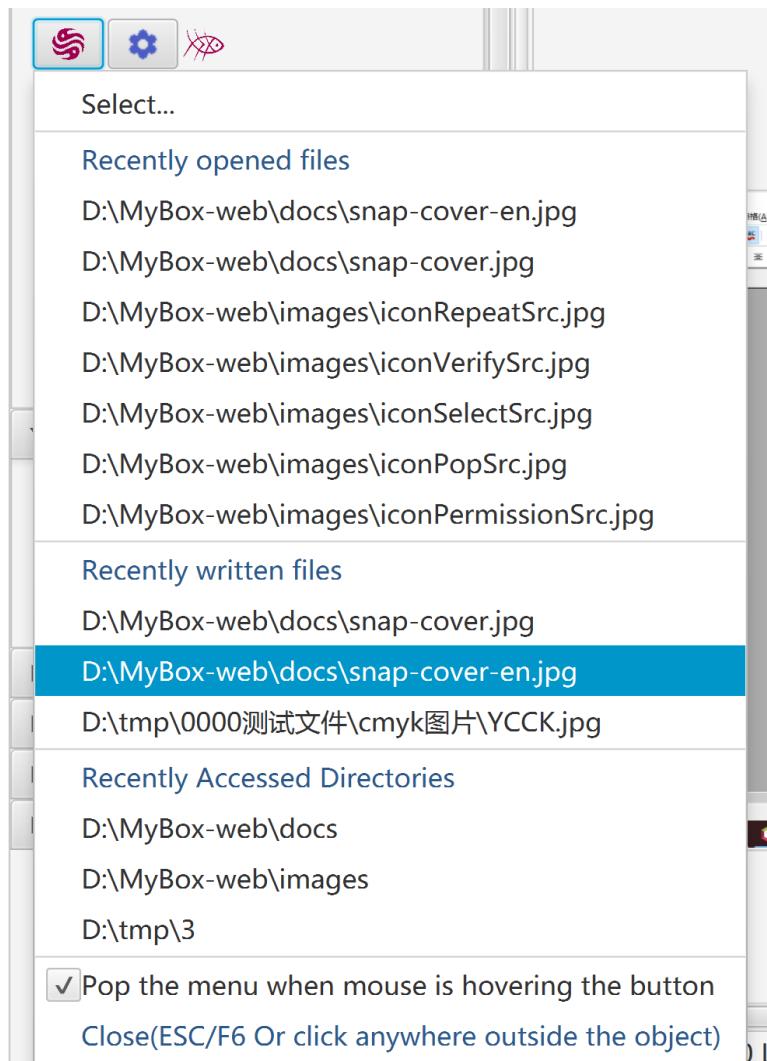

6.5 Restore Scene Size

By selecting menu item "Settings"- "Record size and location of windows", recent size and location of each stage will be saved and restored when it is opened again.

6.6 Recent Visited Files/Directories

When menu item "Settings"- "Pop recent visited files/directories" is selected, each access of files/directories will be record and list will be popped when mouse is moved upon the button of selection. Example:

6.7 Data Table

1. To select rows:
 - Press key SHIFT and click rows to select multiple rows of a range.
 - Press key CTRL and click rows to select multiple rows one by one.
 - Click the checkboxes in head of rows.
2. To edit data:
 - Header texts of editable columns are in blue (Editable primary keys are still in red).
 - Click the editable cell, then its input field will be shown.
 - Press ESC to discard modification. Press ENTER to commit modification.
 - Option to commit modification automatically when cell loses focus.
 - When data is committed, its value will be checked and invalid data will be rejected.
3. To display/hide columns, click button "+" in right side of table header.

This operation does not affect data.
4. To adjust order of columns, click and drag column headers.

This operation does not affect data.
5. - To order rows:
 - Click column header for ascending order by this column.
 - Click column header again for descending order by this column.
 - Click column header for third time to cancel ordering of this column.
 - Press SHIFT and click more column headers to order by multiple columns.

This operation only affect current data in table.
6. Header texts of primary keys are in red and auto-increated keys are in orange.

MyBox User Guide – Overview v6.8.3

MyBox Edit CSV File : CSV - 20 - D:\tmp\mybox_data_v6.7.6\generated\csv\ChinaPopulation_2023-09-28_11-59-23-626_0.csv *

Window Document Image Data File Media Network Settings Recent Accessed Development Help

Select rows and click button to handle.

**Click header to sort rows.
Drag header to adjust order of columns.**

**Click data cell to start editing.
Press ESC key to cancel modification.
Press ENTER key to commit update.**

6.8 Context Menu

1. This menu is popped when right click object like text, image, or table.
2. If interface includes button "Cloud", context menu will be popped when click this button.

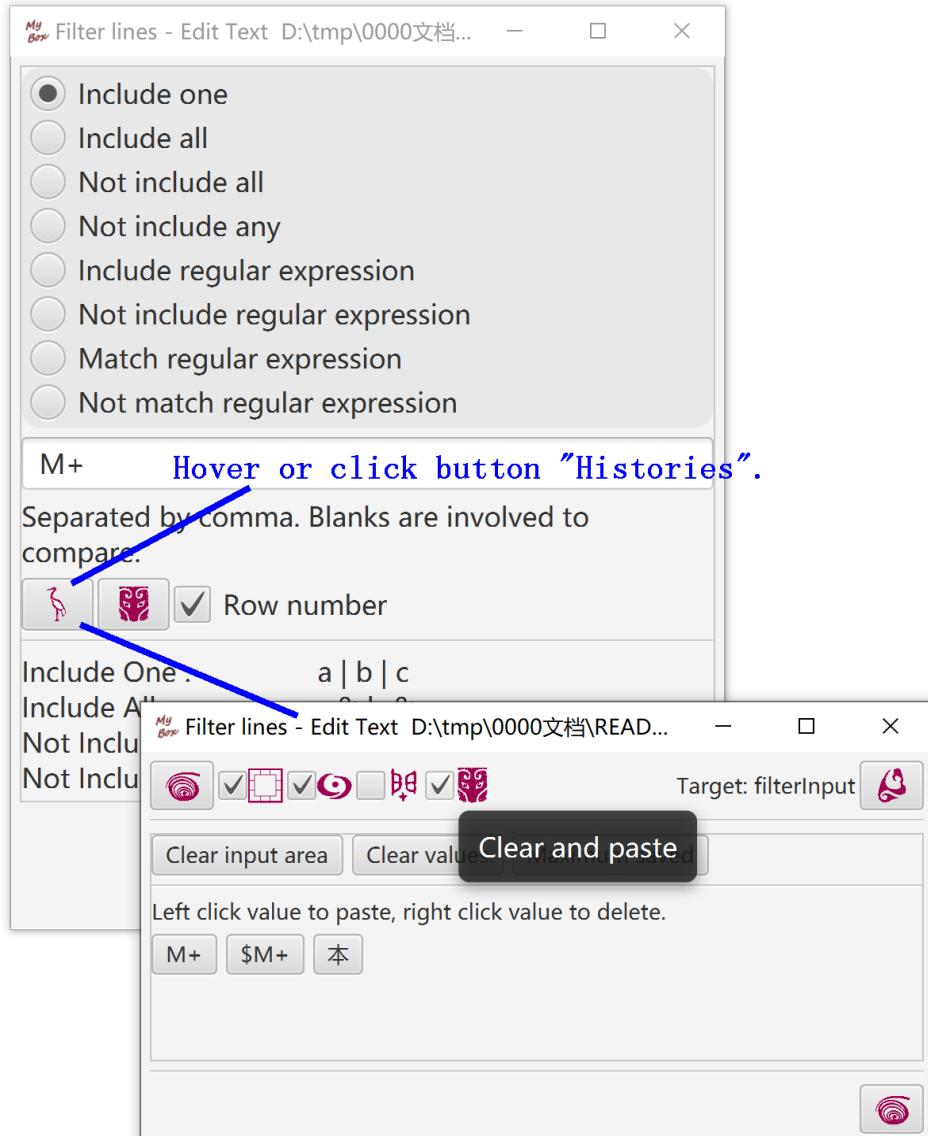

6.9 Window "Examples"

Window "Examples" is popped when hover or click button "Examples".

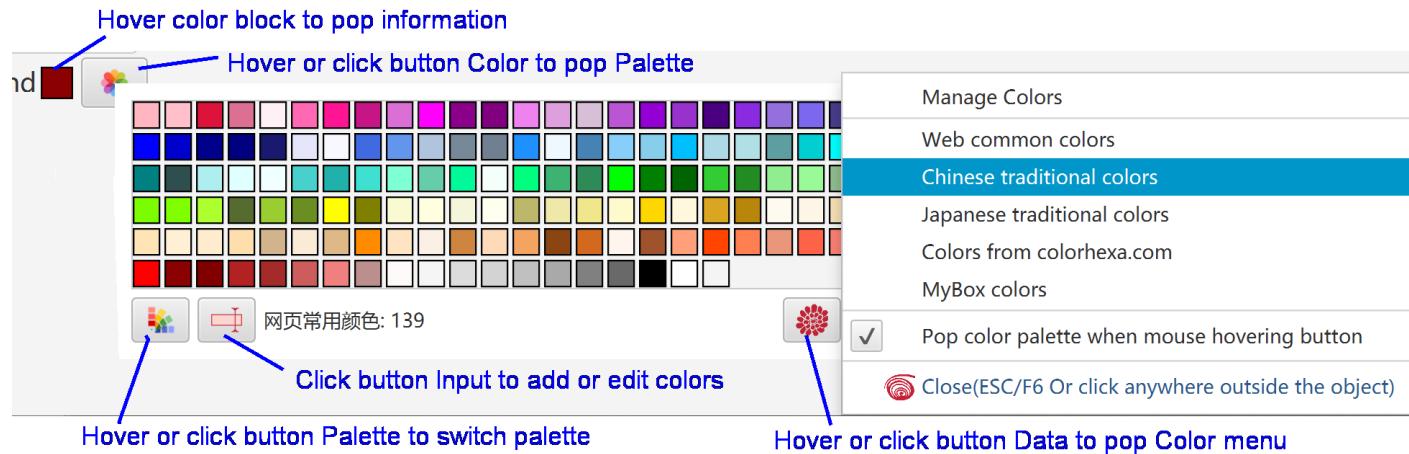

6.10 Window "Histories"

Hover or click button "Histories" to pop window "Histories".

6.11 Color Block and Palette

1. Hover color block to pop color's information.
2. Click color block to pop window Palette, and select or edit colors.

7 Settings

Select "Settings..." in main menu to open window Settings.

The screenshot shows the 'Settings' window of MyBox. The top menu bar includes 'Data', 'File', 'Media', 'Network', 'Settings' (which is highlighted in blue), 'Recent Accessed', 'Development', and 'Help'. Below the menu is a toolbar with icons for new file, edit, and search. The main area is titled 'Settings...' and contains several sections:

- Font size 12px** (selected)
- Font size 15px
- Font size 17px
- Small size icon
- Normal size icon
- Big size icon
- Dark red
- Magenta
- Dark grey blue
- Dark blue
- Brown
- Dark green
- Customize
- Customize colors
- Display controls texts

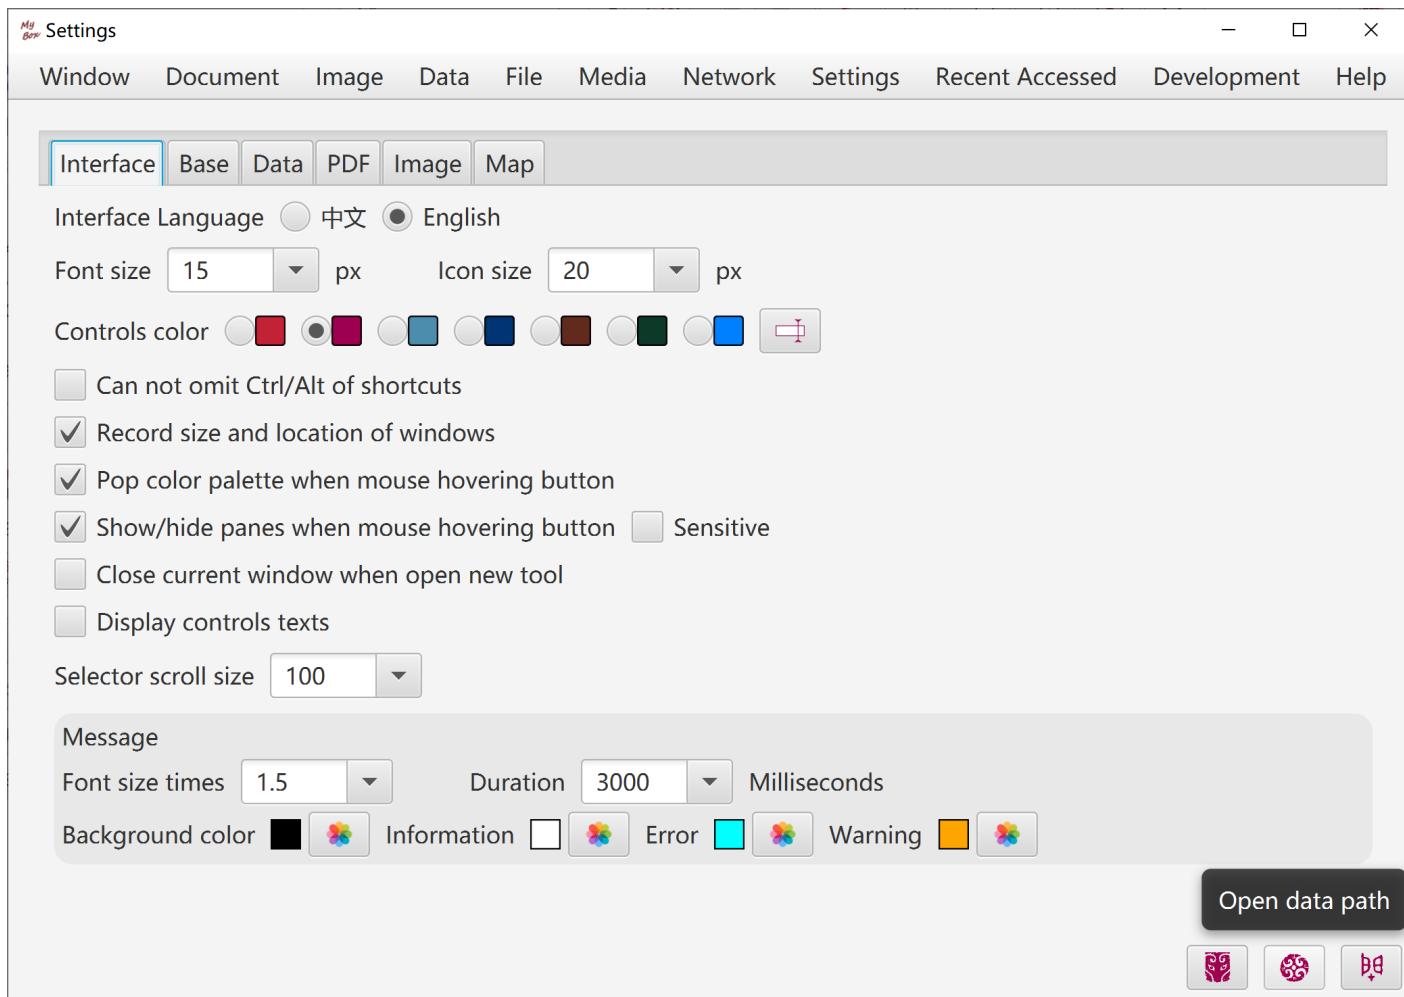

On the right side, there is a list of checkboxes and other settings:

- Can not omit Ctrl/Alt of shortcuts
- Clear expired data before exit
- Pop color palette when mouse hovering button
- Show/hide panes when mouse hovering button
- Pop recent visited files/directories
- Close current window when open new tool
- Record size and location of windows

Below these are links to 'Languages' and 'Interface' (both underlined with arrows), and additional buttons for 'Open data path', 'Clear Expired Data', 'Clear personal settings', and 'Edit Configure File'.

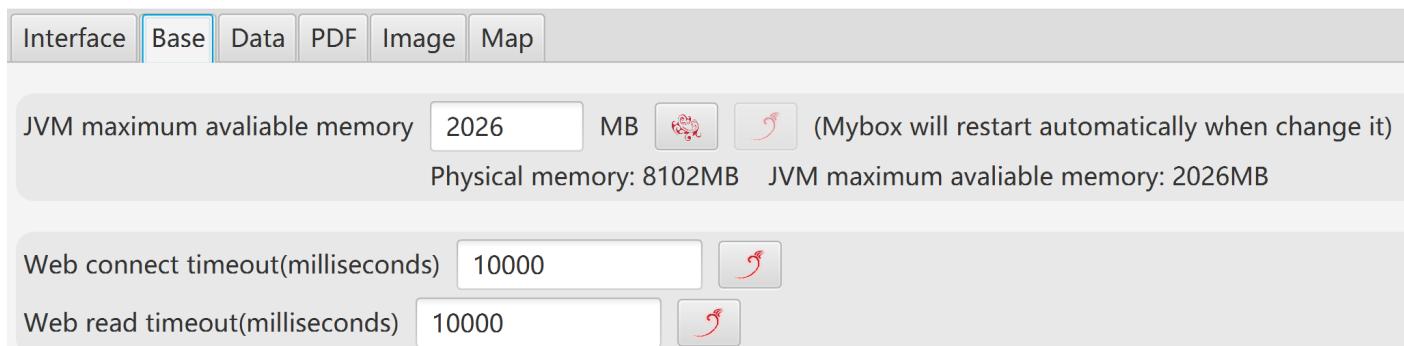

7.1 Interface

1. Language, font size, icon size
2. Select hi-dpi icons(100x100) or common icons(40x40).
3. Color of buttons can be customized.
4. Whether restore last size of each scene.
5. Whether open new stage to display scene.
6. Whether show/Hide splitted panes when mouse passing.
7. Whether pop stage "Set Color" when mouse passing.
8. Font size, color, duration of popped messages.

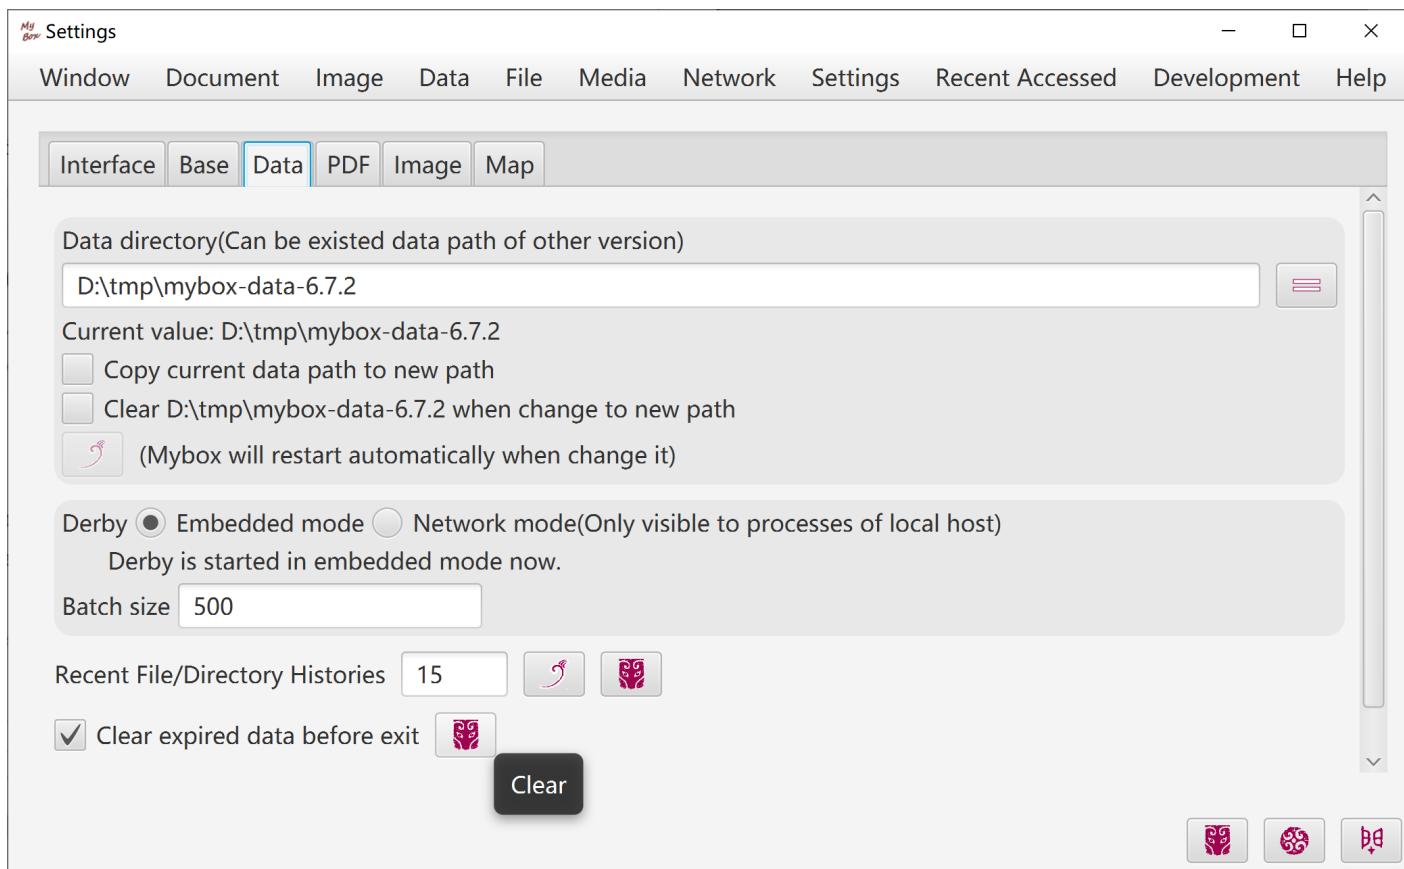

7.2 Base

1. Maximum memory usage of JVM
2. Network timeouts

7.3 Data

1. Data path
2. Derby driver mode and batch size.
3. Whether pop recent visited files/directories. And the number.
4. Whether close alarm clocks when exit program.

7.4 Map

Data keys of map

Interface Base Data PDF Image **Map**

Following are free map keys shared by users of MyBox. You can request and set your private free/commercial map keys.

TianDiTu web key 0ddeb917def62b4691500526cc30a9b1
<https://console.tianditu.gov.cn/api/key>

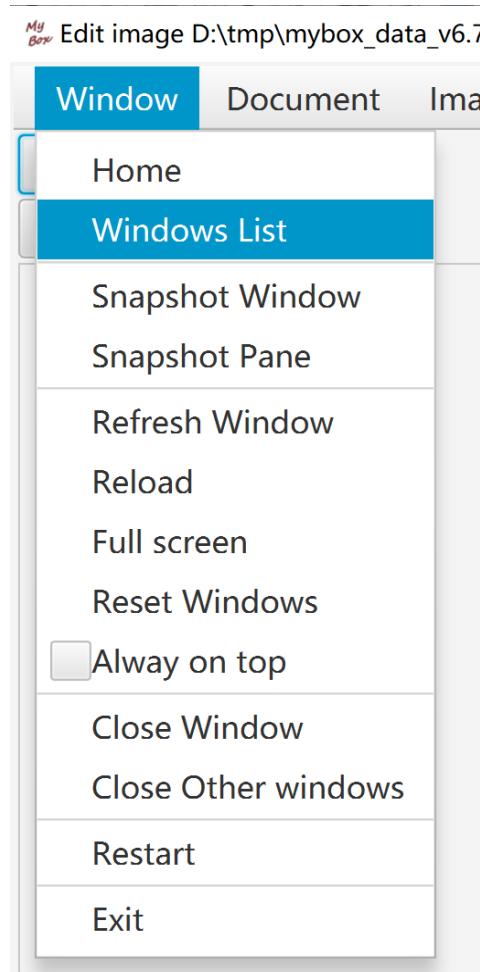

Web key of GaoDe map 06b9e078a51325a843dfefd57ffd876c

Web service key of GaoDe map d7444d9a7fae01fa850236d909ad4450
<https://lbs.amap.com/dev/index>

8 Window

1. Refresh/Reset/Full-screen/Top windows.
2. Close other windows.
3. Reboot MyBox.
4. Recent visited tools.
5. Snapshot of window/pane.

9 Windows List

1. Click "Windows List" in menu "Window" to open this interface.
2. Display all of currently showing windows in MyBox.
3. Select some windows, and click button "Close".
4. Select some windows, and click button "Always on top".
5. Select some windows, and click button "Disable always on top".

Windows List

The screenshot shows the 'Windows List' interface with a toolbar at the top and a table below. The table has columns for window ID, title, visibility, modality, focusability, always on top, child status, width, height, X position, Y position, full screen, iconified, maximized, resizable, and type. A context menu is open over window ID 6, with the option 'Disable "Alway on top"' highlighted. To the right of the table is a sidebar with checkboxes for filtering window properties.

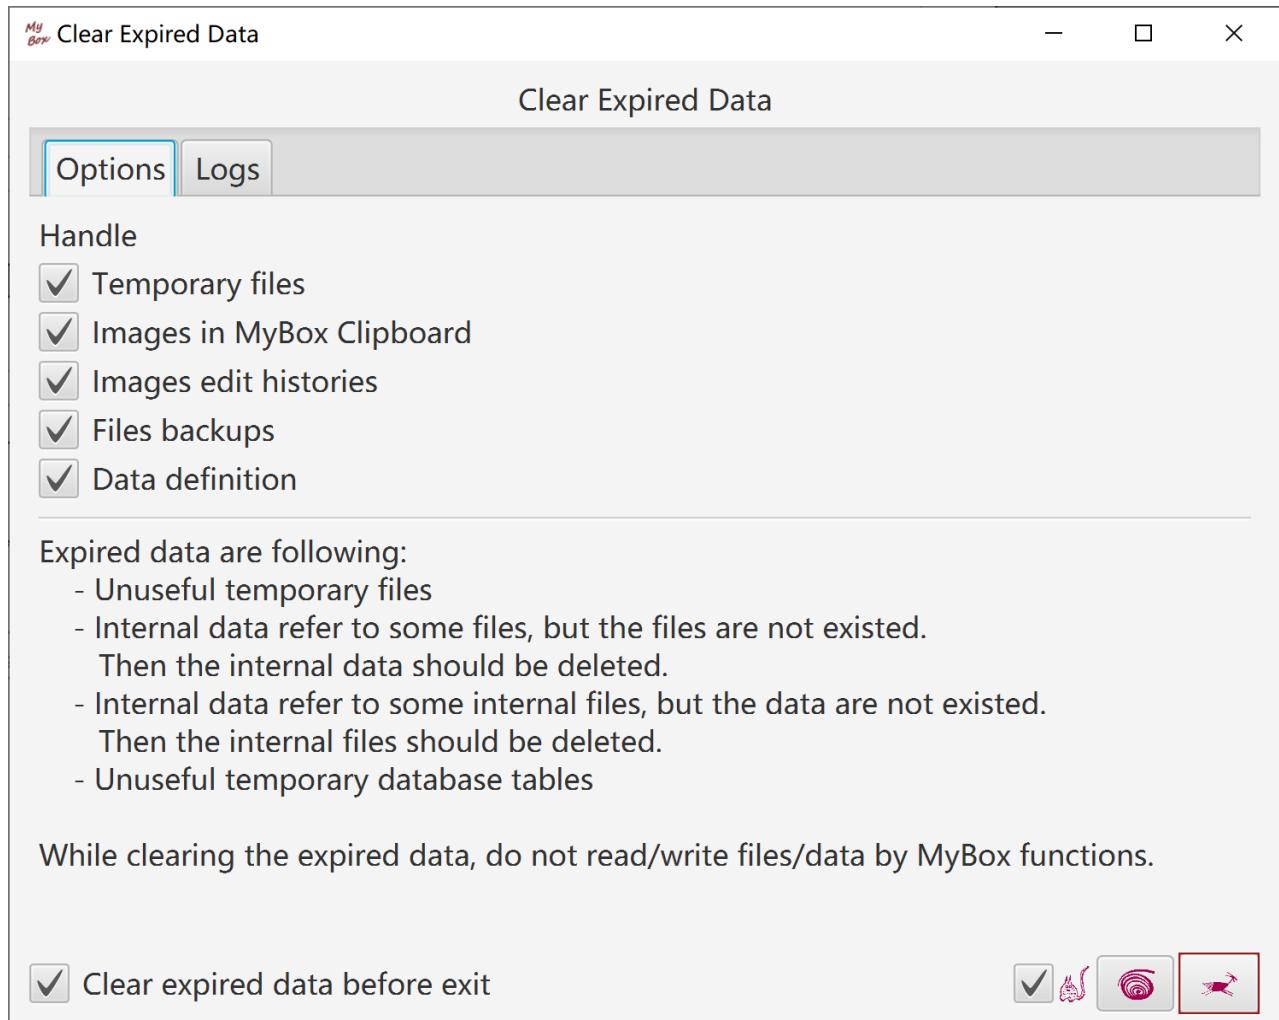

Table r...	Disable "Alway on top"	Sho...	Mod...	Focu...	Alwa...	Is child	Width	Height	X	Y	Full s...	Iconi...	M+
<input type="checkbox"/> 1	View Image	<input checked="" type="checkbox"/>					1012	735	119	132	<input checked="" type="checkbox"/>		
<input type="checkbox"/> 2	View Image *	<input checked="" type="checkbox"/>					1012	735	119	132	<input checked="" type="checkbox"/> Title
